

Diagnostics Nurses

Caring for your pet throughout the Diagnostic process

We think our Diagnostics Nurses at Davies have one of the most exciting, interesting and fulfilling veterinary nursing roles there is. They deal with everything from critically ill emergency cases, to routine follow-up radiographs (X-rays), as well as working with (and maintaining) specialised advanced diagnostic equipment.

Our Diagnostics Nurses are involved with a patient throughout the entire diagnostic phase. The 'phase' is the investigation stage of your pet's journey. Our nurses work closely with our Diagnostics team and monitor and observe patients through every aspect of diagnostic procedures.

They also assist with advanced imaging techniques such as CT, MRI and Fluoroscopy.
